# JOB OFFER

Choosing our Company means choosing a company where you will be empowered to shape your career in the way you'd like, where you'll be supported and inspired by a collaborative community of colleagues around the world, and where you'll be able to reimagine what's possible. Join us and help the world's leading organizations unlock the value of technology and build a more sustainable, more inclusive world.

## YOUR TEAM/ PROJECT:

For 10 years, we've been a dedicated partner to Clients around the world, helping them develop, transform and manage their businesses.
A diverse collective of 500+ testing experts are all driven by one shared passion: continuous quest for quality improvement. We leverage our expertise in test management, test automation, cloud, data, security and performance to address the entire breadth of business needs.

## YOUR TASKS:

- you will work in a team conducting manual and automated tests (UI and API);
- you will design test cases and implement automated tests;
- you will also configure automated test suites in a CI/CD environment;
- you will execute tests, analyze, and report results;
- you will participate in creating test frameworks.

## YOUR PROFILE:

- you have approximately 3 years of experience in manual and automated testing;
- you have an analytical approach, can work with documentation, and design test cases;
- you can implement basic automated GUI and/or API tests in Java or JavaScript/TypeScript;
- you are characterized by curiosity and interest in Cloud solutions, GenAI, testing frameworks, and open-source tools;
- you have a very good command of the English language.

## NICE TO HAVE:

- education in IT or related fields;
- basic knowledge of agile methodologies;
- basics of German.
